Digital Dark Spot - Research Inventory (Phase 1)

Team NEXORA - GRAVITON 2026 - as of 2026-10-30

Status and scope

This is a partial first pass: the CSSS core documents and the Catalyst storage limits are verified, and the rest of the mission is still open. Done: official CSSS guidelines, the education.gov.in scheme page, Catalyst storage limits, FEVER and VitaminC basics. Not done: licences for SciFact, HOVER, KILT and the document-understanding benchmarks; the tool comparison; Catalyst function runtimes and time limits.

Verified official sources (Tier 1)

Three official documents were checked; the guidelines PDF applies from AY 2022-23 onwards and never names 2026-27.

Document	What it is	Status
CSSS guidelines PDF (scholarships.gov.in/public/schemeGuidelines/CSSS_GUIDLINES_06022024.pdf)	Department of Higher Education guidelines, applicable AY 2022-23 onwards	Opened and read in full
education.gov.in/node/255	Lists the 2025-26 closing dates: 31.10.2025 / 15.11.2025 / 30.11.2025	Direct fetch returned no text; read from search snippet; last-updated date unknown
Rajya Sabha answer RSUQ_3714 (education.gov.in)	AY 2025-26 figures as of 22.03.2026	Dated reference, not scheme rules

Guidelines content: above 80th percentile in Class 12; regular degree course; no other scholarship; family income up to Rs 4.5 lakh (income certificate only for fresh applicants); renewal needs 50% marks and 75% attendance; Rs 12,000 a year at graduation level, with B.Tech getting Rs 20,000 only in year 4; up to 82,000 fresh scholarships, 50% for girls; two-level verification.

Unverified or conflicting

The 2026-27 deadline is unverified: every date found comes from secondary sites, and they disagree (30 Sep 2026, 25.10.2026, 31 Oct 2026). Continuation of the scheme beyond March 2026 is not confirmed by any official document found. The official FAQ PDF URL is unconfirmed. The 2018/2019 guidelines (Rs 10,000 rate) were found only on mirrors. Check the NSP login before relying on any date.

Zoho Catalyst limits

Limit	Value	Source
File Store upload size	100 MB per file	Catalyst docs
File Store capacity	1 GB per project in development; no upper limit in production	Catalyst docs
File Store folders	No sub-folders	Catalyst docs
Data Store text column	10,000 characters	Zoho forum KB (not official docs)
Data Store rows (development)	5,000 per table; 25,000 per project	Zoho forum KB (not official docs)
Function runtimes, time limits	Unverified: docs fetch failed	None

Benchmark datasets checked so far

None of the datasets checked tests information-gap detection directly, so the project needs its own benchmark. FEVER: 185,445 claims from altered Wikipedia sentences; licence unverified. VitaminC: over 450,000 claim-evidence pairs from over 100,000 Wikipedia revisions; useful for outdated information; licence unverified. SciFact, HOVER, KILT, DocVQA, FUNSD, SROIE: not yet checked.

Proposed MVP benchmark and schema

About 36 cases, three per category A to L, with human-reviewed labels; about 20 from real CSSS documents and about 16 synthetic and labelled as such. Tables: research_sessions, sources, source_chunks, requirements, claims, evidence.

Next steps

1. Get the 2026-27 deadline and official FAQ from your NSP login. 2. Verify Catalyst function limits from official docs. 3. Check licences for FEVER, SciFact, HOVER and VitaminC from their owners' pages. 4. Compare PyMuPDF, Trafilatura, Docling and Tesseract/PaddleOCR.
